FRAMES, RACKS, BAYS, AND CABINETS

CONTENTS	PAGE
1. GENERAL	1
2. APPLICATION OF ABBREVIATIONS	1
3. ABBREVIATIONS—FRAMES, RACKS, BAYS, AND CABINETS	3
4. ABBREVIATIONS AND THEIR MEANINGS	16

1. GENERAL

1.01 This section covers the approved abbreviations for the names of equipment frames, racks, bays, and cabinets which are stamped on the product in the form of equipment designations, and supplements Section 005-101-111 covering general terms and their abbreviations. The applications, forms, and rules of abbreviations covered in Section 005-101-111 shall be followed unless otherwise specified herein.

1.02 This section is reissued to include additional terms and abbreviations.

1.03 The major content of this section is comprised of Parts 3 and 4. Part 3 lists the equipment names arranged alphabetically, followed by their abbreviations, while Part 4 lists the same abbreviations arranged alphabetically, followed by their meanings.

1.04 Abbreviations for new frames, racks, bays, and cabinets not listed in this section shall use the standard abbreviations as shown in Section 005-101-111, either singly, or in word combinations, as required. The Head, Standards and Materials

2. APPLICATION OF ABBREVIATIONS

Engineering Department 6251, Bell Telephone Laboratories, Incorporated, shall be notified of any new abbreviations assigned to equipment of this type.

2.01 Old abbreviations differing from current standards are indicated by an asterisk (*) and shall be used only when specified on products that are to be added to existing equipments containing the same abbreviation.

2.02 Alternative abbreviations are shown for some terms in Part 3, each alternative usually consisting of progressively fewer characters. The first abbreviation is to be used when space will permit and when clarity is of utmost importance. The shorter alternative abbreviation may be used when space will not permit a longer abbreviation, such as for the stamping of designations.

2.03 When abbreviations for equipment names listed herein are required for applications such as in text, or in cabling diagram figures on drawings, the standard abbreviations shown in Section 005-101-111 shall be used for the individual words of the equipment name instead of the designation appearing on the product. For example, AUX INC REG LK FR shall be used instead of the equipment designation AIRL for Auxiliary Incoming Register Link Frame. When applicable, an abbreviation describing the type of equipment (such as FR, RK, BAY, CAB, etc) shall be included in the abbreviation for the equipment name as shown in the above example.
