

## **APPARATUS CATALOG CODE BOOKS**

# TRANSMITTERS SECTION A22

Scanned from a current code book (July 1960) and an obsolete code book (April 1946) issued by the engineering department, Kellogg Switchboard and Supply Company. The information for each section from both books has been combined under the same heading in these PDF files. Since the books are not matched up as to date there will be some missing information, when researching an item be sure and look in both books' index for the section. The current code book index also lists all the obsolete items through 1960 whereas the obsolete book index lists only items through 1946. Some files also contain charts or other supporting information to aid the researcher.

**ORIGINALLY IN THE COLLECTION OF CHARLES A. PLEASANCE AND FURNISHED FOR SCANNING BY KEITH CHESHIRE FROM HIS COLLECTION**
